

Please see our offer for braking systems, in line with our motto:

## **ASK OUR EXPERTS – THEY WILL BE HAPPY TO ANSWER YOUR QUESTIONS**

Below we present the questions, most frequently asked by our Customers, and answers given by our experts:

**1. Who do you aim your offer for?**

Our offer is addressed to producers and sellers of tractors, who have got service centre for professional installation of systems.

**2. For what kind of vehicles do you design and make your braking systems?**

We specialise in designing and manufacturing of pneumatic braking systems, mounted on agricultural tractors, which are used for braking trailers and semi-trailers, which are pulled by tractors.

**3. Do you do the technical documentation of systems, necessary for the homologation and sales purposes?**

Yes. We meet all the customers' needs in terms of documentation.

**4. Do your braking systems undergo tests before sale?**

In our factory, we check the main elements of the system on the testing stations. Then, after the installation of the entire system on the tractor, we conduct tests to check compliance with regulations and standards.

**5. Are all of the braking systems elements of your own production?**

No. We are a manufacturer of air compressors, brackets for mounting of the elements of the system on tractors, pulleys. The other elements of the proven quality, we buy from our suppliers.

## **WE ARE LOOKING FORWARD TO COOPERATE WITH YOU**
